Notice of Vision and Hearing Screening for Special Education Purposes

Your student is scheduled for a triennial review of his/her special education program and services during the next school year. As part of this triennial assessment, a vision and hearing screening will be conducted. Next year the district will conduct this screening during the regular, mandated hearing and vision screenings for K, 2, 5, and 8th graders.

All students scheduled for triennial IEP's will have their hearing and vision screened with the mandated screenings. Your student will have their vision screening done by an optometrist contracted with the district or a trained nurse. Their hearing will be tested by audiologists or a trained nurse. This information will be reported to you at the IEP meeting, or earlier if your student fails either screening.

If you do not want your student to participate in the vision and hearing screening at school, please contact the nurses via email at RUSDnurses@rocklinusd.org.
