Diabetic Forms and Supplies

The following needs to be turned into the Health Office prior to the start of school.

Forms Needed

Please see the attached copy of our Diabetic Medical Management Plan(DMMP). An updated DMMP is required each school year.

Medical Supplies Needed

*As recommended by your physician

___ Blood glucose meter/strips/back up batteries

___ Extra Insulin/syringes/pump supplies

___ Glucagon syringe

___ Ketone testing strips

___ Fast acting source of glucose (juice, glucose tabs, etc)*

___ Snacks (carb + protein is good)*

___ Bottled water (for increased thirst when sugar is high, water fountains are available all over campus, but they can drink more if they have it with them at all times)

Students are allowed to carry these supplies on campus if the physician indicates this on the DMMP.

If the student is allowed to carry their own supplies, the Health Office requests a second set of the above items be kept in the health office in the event of an emergency. Medical supplies will be kept in plastic bags with the student's name written on it and locked in the health office.

Nutrition Supplies Requested

Snacks should be brought in a small plastic container with their name written on the outside. The small plastic shoe boxes are recommended. These will be kept in the in the health office.

No supplies will be shared or used for other students. If you have any additional questions or concerns please contact your campus Health Aide or Nurse or email the Rocklin Unified School District Nurses at RUSDnurses@rocklinusd.org.
